

# ELECTRICAL ESTUDIES FOR INDUSTRIAL AND RENEWABLE SYSTEMS

# ABOUT US

We develop electrical engineering studies for industrial electrical systems and solar and wind power generation plants, with a focus on the safety of people, the protection of electrical equipment and the continuity of the operation.

## FOR INDUSTRIAL AND RENEWABLE SYSTEMS

Short circuit.

Protective relay coordination.

Arc flash.

DC arc flash.

Load flow.

Harmonics flow.

Grid Code.

## FOR HIGH VOLTAGE SUBSTATIONS AND TRANSMISSION LINES

Differential, distance and directional protections.

ETAP Solution Provider distinction (as an expert engineering firm in the use of ETAP analysis software).
